^{*)} Euro Styl S.A. is the parent of the Euro Styl group.

The principal business of the group is the construction and sale of residential properties.

Dom Development Grunty Sp. z o.o., in which the Parent holds a 46% equity interest, is fully consolidated as its financial and operational policies are controlled by the Management Board appointed by Dom Development S.A. The subsidiary's business involves acquiring properties for the Group's residential development projects.

Dom Development S.A. does not hold any equity interests in Dom Land Sp. z o.o., but controls the company through its Management Board members. Dom Land Sp. z o.o. holds a 54% interests in Dom Development Grunty Sp. z o.o.

All Group companies conduct business in Poland in accordance with the Commercial Companies Code, and their duration is indefinite.

In the 12 months ended 31 December 2024, the Group did not discontinue any of its operations.

MATERIAL CHANGES IN THE GROUP STRUCTURE, INCLUDING MERGERS, ACQUISITIONS, DIVESTMENTS, LONG-TERM INVESTMENTS. DEMERGERS. RESTRUCTURINGS. AND BUSINESS DISCONTINUATION

• Further consolidation of residential development activities in the Krakow market within Dom Development Krakow Sp. z o.o.

On 10 June 2024, Dom Development S.A. sold interests in its subsidiary Dom Development Krakow 12 Sp. z o.o. to another subsidiary, Dom Development Krakow Sp. z o.o.

In June 2024, Dom Development Krakow 12 Sp. z o.o. announced an intended merger of Dom Development Krakow 12 Sp. z o.o. (as the acquiree) and Dom Development Krakow Sp. z o.o. (as the acquirer). The merger was registered with the National Court Register on 1 August 2024.

The business combination described above completed the process of consolidating the Group's residential property development activities in the Krakow market within Dom Development Krakow Sp. z o.o.

Repayment of a capital contribution by Dom Development Wroclaw Sp. z o.o.

On 28 June 2024, the Company received a partial repayment of a capital contribution from Dom Development Wroclaw Sp. z o.o. in the amount of PLN 18,300 thousand.

Formation of joint ventures within the Euro Styl group

In 2024, Euro Styl S.A. entered into two investment agreements for the execution of residential development projects through special purpose vehicles established specifically for this purpose. Pursuant to these joint venture agreements, Euro Styl S.A., together with its business partners, will undertake residential property development projects on land acquired directly by these joint ventures. Further details on these joint ventures and the scope of their activities are provided in Note 7.39.

Except for the transactions noted above, the Group did not make any material changes to the structure of its holdings in subsidiaries, associates, or joint ventures during the 12 months ended 31 December 2024.

7.2 BASIS OF PREPARATION OF THE CONSOLIDATED FINANCIAL STATEMENTS

These consolidated financial statements have been prepared on a historical cost basis.

They have been prepared on the assumption that the Company will continue as a going concern for the foreseeable future.

The Russian invasion of Ukraine, which began on 24 February 2022, continues to disrupt the economic environment across the region. The Company and its subsidiaries operate exclusively in Poland. In the view of the Management Board, the war may impact demand for residential properties, construction costs, and the availability of subcontractors. As at the date of these consolidated financial statements, all of the Group's projects were progressing in line with plan or ahead of schedule. The Management Board continues to monitor developments closely and assess their potential implications at both the individual project level and from the perspective of the Group's long-term strategy. Based on its assessment, the Management Board considers that, as at the date of authorisation of these consolidated financial statements, the Group meets all necessary conditions to continue as a going concern for the foreseeable future.

The functional currency of the Parent and the other companies included in these consolidated financial statements is the Polish zloty. These consolidated financial statements have been prepared in the Polish zloty ('PLN'). Financial data presented in these consolidated financial statements are expressed in thousands of Polish zloty unless stated otherwise.

The accounting policies applied to the measurement of assets and liabilities and the determination of financial results, as presented in the notes to these consolidated financial statements, are consistent with the accounting principles adopted by the Parent.

7.3 STATEMENT OF COMPLIANCE

Polish legal regulations require the Group to prepare its consolidated financial statements in accordance with the International Financial Reporting Standards ('IFRS') as adopted by the European Union ('EU'). Given the ongoing process of IFRS endorsement within the EU and the nature of the Group's activities, there are no differences between the IFRS standards that have become effective and those endorsed by the EU for the financial year ended 31 December 2024 in respect of the accounting policies applied by the Group.

These consolidated financial statements have been prepared in compliance with all applicable IFRS as adopted by the European Union.

IFRS include standards and interpretations issued by the International Accounting Standards Board ('IASB') and the International Financial Reporting Interpretations Committee ('IFRIC').

Certain Group entities maintain their accounting records in accordance with the accounting policies prescribed by the Polish Accounting Act of 29 September 1994 (the 'Act'), as amended, and related regulations ('Polish Accounting Standards'). The consolidated financial statements include adjustments (not reflected in the statutory accounting records of these entities) to align their financial statements with IFRS.

The accounting policies applied in the preparation of these consolidated financial statements are consistent with those applied in the preparation of the Group's consolidated financial statements for the year ended 31 December 2023, except for the adoption of the following amendments to standards and new interpretations applicable to annual periods beginning on 1 January 2024:

- Amendments to IFRS 16 Leases. In September 2022, the IASB amended IFRS 16 Leases to add subsequent measurement requirements for lease liabilities arising from sale and leaseback transactions that satisfy the requirements of IFRS 15 to be accounted for as a sale. The amendments require a seller-lessee to measure lease liabilities arising from a leaseback in a manner that precludes the recognition of any gain or loss attributable to the retained right of use. This requirement is particularly relevant where a leaseback arrangement includes variable lease payments that are not linked to an index or rate, as such payments are excluded from the definition of 'lease payments' under IFRS 16.
- IAS 1 Presentation of Financial Statements. The amendments to IAS 1 clarify the presentation of liabilities as either current or non-current and specify how contractual covenants that an entity must comply with affect their classification. The amended IAS 1 provides that liabilities are classified as current or non-current depending on the rights existing at the end of the reporting period. This classification is unaffected by the entity's expectations or by events occurring after the reporting date, such as credit facility covenants that must be met post-reporting.
- Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures disclosure of information about supplier finance arrangements. Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures introduce new disclosure requirements for supplier finance arrangements (e.g. reverse factoring). Entities must disclose specific information on supplier finance arrangements to enable users of financial statements to assess their impact on the entity's liabilities and cash flows, as well as their implications for liquidity risk exposure. The amendments are intended to enhance the transparency of disclosures related to such arrangements without altering the principles of recognition and measurement.

The Management Board has reviewed the amendments and concluded that they have no material impact on the Group's financial position, results, or the scope of disclosures in these consolidated financial statements.

Issued standards and interpretations that are not yet effective and have not been early adopted by the Group

In these consolidated financial statements, the Group has not elected to early adopt the following issued standards, interpretations, or amendments to existing standards prior to their effective date:

- Amendments to IFRS 10 and IAS 28 regarding sale or contribution of assets between an investor and its associates or joint ventures. The amendments resolve the previous inconsistency between the requirements of IFRS 10 and IAS 28. The accounting treatment depends on whether the non-monetary assets sold or contributed to an associate or joint venture constitute a business. If the non-monetary assets qualify as a business, the investor recognises the full gain or loss arising from the transaction. However, if the assets do not meet the definition of a business, the investor recognises the gain or loss only to the extent of the interests held by unrelated investors in the associate or joint venture. As at the date of these consolidated financial statements, endorsement of the amendment had been postponed by the European Union.
- IFRS 18 Presentation and Disclosure in Financial Statements. In April 2024, the IASB issued new IFRS 18 Presentation and Disclosure in Financial Statements. The standard is to replace IAS 1 Presentation of Financial Statements, and will be effective as of 1 January 2027. The amendments to IAS 1 address three key areas: the presentation of the statement of profit or loss, disclosure requirements for certain performance measures, and the principles governing the aggregation and disaggregation of information in financial statements. The new standard is effective for reporting periods beginning on or after 1 January 2027. As at the date of these consolidated financial statements, the amendments had not yet been endorsed by the European Union for application.
- Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rate. In August 2023, the IASB issued amendments to IAS 21 The Effects of Changes in Foreign Exchange Rate, Which are designed to assist entities in assessing whether a currency is exchangeable for another and in estimating the spot exchange rate when it is not. Furthermore, where a currency is not exchangeable, the amended standard requires entities to disclose additional information on the methodology used to determine an alternative exchange rate. The amendments are effective for reporting periods beginning on or after 1 January 2025.
- Amendments to the classification and measurement of financial instruments amendments to IFRS 9 and IFRS 7. In May 2024, the IASB issued amendments to IFRS 9 and IFRS 7 to: a/ clarify the date of recognition and derecognition of certain financial assets and liabilities, with exemption for certain financial liabilities settled through electronic transfer; b/ clarify and add further guidance on the assessment of whether a financial asset meets the SPPI test; c/ add new disclosure requirements for certain instruments whose contractual terms may change cash flows; and d/ update disclosure requirements for equity instruments designated at fair value through other comprehensive income (FVOCI). The amendments are effective for reporting periods beginning on or after 1 January 2026. As at the date of these consolidated financial statements, the amendments had not yet been endorsed by the European Union for application.

The Management Board is currently assessing the impact of these standards on the Group's financial position, results, and the scope of disclosures in the consolidated financial statements. The Management Board does not anticipate that the new standards and amendments to existing standards will have a material impact on the Group's consolidated financial statements in the period of their initial application.

7.4 SIGNIFICANT ACCOUNTING POLICIES

BASIS OF CONSOLIDATION

These consolidated financial statements comprise the separate financial statements of Dom Development S.A. and its subsidiaries. The financial statements of the subsidiaries, adjusted as necessary to ensure compliance with IFRS, are prepared for the same reporting period as those of the Parent, using consistent accounting policies and a uniform approach to the recognition of transactions and economic events of a similar nature. Adjustments are made as necessary to align accounting policies across the Group.

All material balances and transactions between Group entities, including unrealised gains from intra-Group transactions, have been fully eliminated. Unrealised losses are eliminated unless they provide evidence of an impairment.

SUBSIDIARIES

Subsidiaries are consolidated from the date when the Group obtains control of them and cease to be consolidated when the control is lost. Control is exercised by the Parent when it holds, directly or indirectly through its subsidiaries, more than half of the voting rights in a given entity, unless it can be demonstrated that such ownership does not constitute control. Control is also deemed to exist when the Company has the ability to direct the financial and operating policies of an entity.

Changes in the Parent's ownership interest that do not result in the loss of control over a subsidiary are accounted for as equity transactions. In such cases, to reflect changes in relative ownership interests, the Group adjusts the carrying amounts of controlling and non-controlling interests. Any difference between the adjustment to non-controlling interests and the fair value of the consideration paid or received is recognised in equity and attributed to the Parent's owners.

INVESTMENTS IN ASSOCIATES AND JOINT VENTURES

Investments in associates and joint ventures are consolidated using the equity method. These are entities over which the Parent exerts significant influence, either directly or through its subsidiaries, but which are not its subsidiaries. The financial statements of associates and joint ventures serve as the basis for measuring the Parent's interests using the equity method. The financial year of these entities is aligned with that of the Parent. These entities apply the accounting policies set out in the Act. Before determining the Group's share of the net assets of associates and joint ventures, appropriate adjustments are made to align their financial data with the IFRS standards applied by the Group. Investments in these entities are recognised in the balance sheet at cost, adjusted for subsequent changes in the Parent's share of their net assets, and reduced by any impairment losses, where applicable. The Group's share of these entities' profits or losses is recognised in consolidated profit or loss. An adjustment to the carrying amount may also be required due to changes in the proportion of the Group's interest in an associate or joint venture arising from changes in the entity's other comprehensive income. The Group's share of such changes is recognised in its own other comprehensive income.

Investments in associates and joint ventures are assessed for impairment when there is evidence indicating a potential impairment loss or when a previously recognised impairment loss is no longer required.

PROPERTY, PLANT AND EQUIPMENT

All property, plant and equipment are measured at cost, less accumulated depreciation (except for land) and any accumulated impairment losses. Acquisition cost includes the cost of replacing components of equipment when incurred, provided the expenditure is material. Depreciation is calculated on a straight-line basis over the asset's useful life. Buildings and structures are depreciated at rates ranging from 2.5% to 4.5%, vehicles at 20%, and equipment and other fixed assets at rates between 10% and 30%.

The right-of-use asset for office space is recognised in accordance with IFRS 16 Leases and depreciated over the lease term.

INVENTORY

Finished products

Finished goods primarily consist of residential units and parking spaces. They are measured at the lower of cost and net realisable value.

Net realisable value represents the estimated selling price, as determined by the Management Board based on prevailing market conditions.

Work in progress

Work in progress is measured at the lower of cost and net realisable value. Where a discrepancy arises, a write-down is recognised. For the Company's residential development projects, the assessment of whether an impairment write-down is required is based on the impairment test described below, which evaluates production cost against net realisable value.

Inventory impairment test

If a residential development project is expected to generate a loss, a write-down on work in progress is recognised immediately in the statement of profit or loss. A write-down may also be recognised for properties where the development process is exposed to a material risk of significant delay.

Budgets are prepared for each residential development project, covering both actual and projected cash flows, and are updated at least quarterly. For impairment testing purposes, project budgets include all historical and forecast net revenues, net of direct costs associated with land purchase, design, construction, and other project-related expenses, including show homes and on-site sales offices. Project budgets also account for both past and projected borrowing costs, as well as anticipated customer claims where applicable.

Project budgets are prepared in accordance with the principle of prudent valuation.

If the project margin, calculated based on total revenues and the aforementioned costs, is positive, no write-down on inventories is required. A negative margin indicates a potential impairment, which, following a detailed assessment of the project's cash flows, results in the recognition of a write-down on inventories equivalent to the estimated negative margin.

The write-down is recognised within cost of sales under 'Adjustment of inventories to net realisable value.' A previously recognised write-down may be reversed if the projected margin for the project turns positive.

If a project consists of multiple phases, the impairment assessment of inventories is conducted as follows:

- a) all future phases of the project are treated as a single unit for impairment testing purposes;
- b) each phase where both sales and construction have commenced is assessed separately from the remaining phases for impairment.

BORROWING COSTS

Borrowing costs are recognised as an expense in the statement of profit or loss in the period in which they are incurred, except for capitalised costs – i.e., costs that can be attributed to the production cost of qualifying assets (in the case of the Group: work in progress).

Borrowing costs are capitalised to work in progress only during periods when a residential development project is considered active. A project is deemed active when design or construction work is underway for acquired land, or when key administrative approvals necessary for project execution are being obtained.

Capitalisation of borrowing costs ceases when substantially all activities necessary to prepare the residential units for handover to customers have been completed.

Capitalisation is suspended if residential development activities related to the project – including design work, construction, or obtaining necessary permits and administrative approvals – are temporarily halted.

TRADE AND OTHER RECEIVABLES

Trade and other receivables are measured in accordance with IFRS 9, which introduced the estimation of impairment losses on financial assets using the expected credit loss model.

BANK DEPOSITS OVER THREE MONTHS

Bank deposits with a maturity over three months (as of the date when they are made) are presented in 'Current financial assets'.

CASH AND CASH EQUIVALENTS

Cash and short-term deposits with original maturities of up to three months (as at the date of their inception) are recognised in the balance sheet at nominal value and comprise cash held at banks and on hand, as well as short-term deposits with original maturities not exceeding three months. The balance of cash and cash equivalents presented in the statement of cash flows consists of the cash and cash equivalents described above, net of outstanding current account overdrafts.

INTEREST-BEARING BORROWINGS AND DEBT SECURITIES

At initial recognition, all interest-bearing borrowings and debt securities are measured at fair value, net of transaction costs incurred to obtain financing.

Subsequent to initial recognition, interest-bearing borrowings and debt securities are measured at amortised cost using the effective interest rate method.

The calculation of amortised cost reflects transaction costs incurred to obtain financing, as well as any discounts or premiums arising on issuance.

Drawdowns and repayments of borrowings and debt securities are presented in the statement of cash flows as cash inflows or outflows from financing activities and are not offset within the reporting period. An exception applies to overdraft facilities, where drawdowns and repayments are presented on a net basis due to their short maturities, high turnover, and rapid settlement cycles.

TRADE, TAX AND OTHER PAYABLES

Short-term trade and other payables, tax liabilities, and other liabilities are presented at amounts due.

Where the time value of money is significant – particularly in the case of retained guarantee deposits – the liability is measured by discounting the forecast future cash flows to present value. If the discounting approach is applied, the unwinding of the discount over time is recognised as finance costs.

PROVISIONS

Provisions are recognised when Group companies have a present obligation (legal or constructive) as a result of past events, it is probable that settling this obligation will require an outflow of economic benefits, and the obligation can be reliably estimated. The costs associated with a provision are recognised in the statement of profit or loss, net of any reimbursements.

REVENUE RECOGNITION

Revenue is recognised to the extent that it is probable that the Group will achieve economic benefits from a given transaction and the revenue can be reliably measured. Before revenue is recognised, the following criteria must be met:

Sale of products

Revenue from the sale of property (including residential units and commercial space) is recognised when control of the property, along with the significant risks and rewards of ownership, is transferred to the buyer. The Company considers this transfer to occur upon delivery of the property to the buyer, evidenced by a signed handover report, provided that the purchase price has been paid in full.

Where a residential development project involving the sale of real estate (including residential units and commercial space) is carried out on land owned by a third party, but the Company is responsible for the execution of the project – including marketing, sales, customer service, and design and construction management – and bears the associated risks, revenue from the sale of such properties is recognised in the same manner as described above for residential development projects undertaken on land owned by the Company or held under a perpetual usufruct right.

Revenue from the rendering of construction services

When it is probable that total contract costs will exceed total contract revenue, the expected loss (the excess of total estimated costs over total estimated revenue) is immediately recognised as an expense in the period and presented within cost of sales as cost of services sold. If revenue recognised using the percentage-of-completion method exceeds invoiced revenue, the difference is recorded as revenue from rendering of services, with a corresponding asset recognised within other current assets.

If revenue recognised using the percentage-of-completion method is lower than invoiced revenue, the difference is recorded as revenue from rendering of services, with a corresponding liability recognised as deferred income.

Revenue from other services

Revenue from the provision of non-construction services, including revenue from property management activities, is recognised in the period in which the service is rendered.

TAXATION

Current tax

Current tax liabilities and receivables for the current and prior periods are measured at the amounts expected to be paid to (or recovered from) the tax authorities, using the tax rates and tax laws that were enacted or substantively enacted as at the reporting date.

Deferred tax

For financial reporting purposes, deferred tax is calculated using the liability method, based on temporary differences as at the reporting date between the tax base of assets and liabilities and their carrying amount as presented in the financial statements.

Deferred tax assets are recognised for all deductible temporary differences, as well as for unused tax credits and unused tax losses carried forward, to the extent that it is probable that taxable profit will be available against which these deductible differences, credits, and losses can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and is reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow for the full or partial recovery of the deferred tax asset. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available to recover the asset.

A deferred tax liability is recognised for the amount of income tax payable in future periods due to taxable temporary differences, i.e. differences that will increase the taxable base for income tax calculation in future periods.

Deferred tax assets and deferred tax liabilities are measured using the tax rates expected to be in effect in the period in which the asset is realised or the liability is settled, based on the tax rates (and tax laws) that are enacted or substantively enacted as at the reporting date.

Income tax related to items recognised outside profit or loss is also recognised outside profit or loss, as follows: in other comprehensive income, for items recognised in other comprehensive income, or directly in equity, for items recognised directly in equity.

The Group offsets deferred tax assets against deferred tax liabilities only when it has a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred tax relates to the same taxable entity and the same taxation authority.

DIVIDENDS

Dividends are recognised when the shareholders' rights to receive the payment are established.

EARNINGS PER SHARE

Earnings per share for each reporting period is calculated as the net profit for the period divided by the weighted average number of shares outstanding during that period.

LEASES

The Group recognises assets and liabilities for all lease transactions with a term exceeding 12 months, except where the leased asset is of low value. Depreciation of the leased asset is recognised separately from interest on the lease liability in the statement of profit or loss.

Right-of-use assets are presented in the balance sheet within the same line item as the corresponding underlying assets would have been classified if owned by the Company (the lessee).

Right-of-use assets related to office space and serviced apartments

The right-of-use assets related to office space and serviced apartments are depreciated, with corresponding finance costs recognised in respect of the lease. These assets are presented in the balance sheet under Property, plant and equipment, while the related lease liabilities are classified as either non-current or current liabilities, as appropriate.

Perpetual usufruct of land

Costs – costs related to the lease of perpetual usufruct rights to land are allocated to Inventory (as Semi-finished products and work in progress) during the execution of a residential development project.

Asset – the related asset is recognised in the balance sheet under Inventory or Short-term receivables.

Liability – the corresponding liability is fully classified under Current liabilities.

This allocation of perpetual usufruct lease payments reflects the fact that these rights pertain to land on which the Group carries out its residential development projects. Accordingly, the lease costs of perpetual usufruct rights are recognised under Inventory (as work in progress) and subsequently expensed to profit or loss as cost of sales when the completed units are transferred to customers, i.e., upon revenue recognition.

On 20 July 2018, the Act on the conversion of perpetual usufruct to land developed for residential purposes into freehold ownership came into effect. The Group treats land subject to this statutory conversion in the same manner as land previously held under perpetual usufruct, accounting for conversion fees in line with the treatment of perpetual usufruct charges.

Classification of lease assets and liabilities related to perpetual usufruct rights to land in the balance sheet

As a general principle, perpetual usufruct rights to land on which residential development projects are carried out are classified as Inventory. The corresponding liabilities for these rights are expected to be settled through their transfer to the buyers of the residential units to which they relate. Liabilities associated with these rights are classified as current liabilities, consistent with the classification of the related Inventories, which are recognised as current assets. This classification reflects the fact that both the inventories and the corresponding liabilities are settled within the Company's operating cycle, which extends from the start of a residential development project to the conversion of inventories into cash.

The Group is legally discharged from its obligation to pay usufruct fees or conversion fees only upon the legal (notarial) transfer of the corresponding share in the land to the buyer of a unit. Until this transfer is completed, the lease liability remains on the Group's balance sheet. Accordingly, upon delivery of the unit to the buyer (which coincides with the recognition of revenue from the sale), the portion of the lease asset relating to the unit is reclassified from Inventory to Receivables from the buyer, in an amount corresponding to the recognised lease liability for the land.

Until the legal title is transferred, both the receivable and the liability are classified as current, as their settlement is expected to occur within the Company's operating cycle through transfer to the buyer. Upon legal transfer of ownership to the buyer, the lease liability and the corresponding receivable are derecognised from the balance sheet.

All future payments arising from perpetual usufruct rights, based on the contractual term of the usufruct (which may be up to 99 years), are discounted. This period is independent of the timeframe anticipated by the Group for holding the perpetual usufruct rights, that is, the period planned for the development of these properties for investment purposes.

7.5 SIGNIFICANT JUDGEMENTS AND ASSUMPTIONS

The following areas required the significant application of management's professional judgement, alongside accounting estimates and underlying business assumptions, in the process of applying the accounting policies.

DEVELOPMENT PROJECT BUDGETS

Decisions to acquire property (land) are based on detailed analyses, with purchase budgets serving as a key tool for assessing the expected profitability of residential development projects. Following the purchase of a property, budgets are updated regularly, drawing on management's best knowledge and experience. All project budgets are reviewed at least every three months and revised as necessary. Updated project budgets form the basis for:

- assessing project profitability and determining the need for inventory write-downs, if applicable
- preparing financial projections, annual budgets, and medium-term plans

RECOGNITION OF REVENUE FROM SALE OF PRODUCTS

Revenue from the sale of property (including residential units and commercial space) is recognised when control of the property, along with the significant risks and rewards of ownership, is transferred to the buyer. Management considers this transfer to occur upon delivery of the property to the buyer, as confirmed by a signed handover report, provided that the full purchase price has been paid.

SEASONALITY

The Group's operations are not subject to any significant seasonal fluctuations.

DETERMINATION OF JOINT CONTROL IN JOINT ARRANGEMENTS

The Group exercises joint control over an entity if it must act collectively with all other investors to direct the entity's relevant activities. This means that no single investor has control over the entity, nor can any investor unilaterally direct its activities without the cooperation of the others. Based on its professional judgement, the Group determines the nature of the joint arrangement in which it participates by assessing its rights and obligations, taking into account the structure and legal form of the arrangement, as well as the contractual terms agreed between the parties.

EXERCISE OF SHARE OPTIONS

On 24 January 2024, the Management Board resolved to increase the Company's share capital from PLN 25,698,422.00 to PLN 25,798,422.00, i.e., by PLN 100,000.00, through the issuance of 50,000 Series AJ ordinary bearer shares with a par value of PLN 1.00 per share and 50,000 Series AK ordinary bearer shares, also with a par value of PLN 1.00 per share. The issue price for both Series AJ and AK shares was set at PLN 50.00 per share. The shares were issued by way of a private placement. The purpose of the issue of shares within the limits of the authorised share capital was to enable the Company to meet its obligations arising from:

- 5th Management Share Option Programme for Mikołaj Konopka, Member of the Management Board, concerning 250,000 Dom Development shares, and
- 7th Management Share Option Programme for Leszek Stankiewicz, Vice President of the Management Board, concerning 250,000 Dom Development S.A. shares (see Note 7.23).

On 30 January 2024, Mikołaj Konopka exercised his share options, subscribing for 50,000 shares of the Company by exercising rights attached to subscription warrants. The issue price of the Series AJ shares was PLN 50.00 per share.

On 6 February 2024, Leszek Stankiewicz exercised his share options, subscribing for 50,000 shares of the Company by exercising rights attached to subscription warrants. The issue price of the Series AK shares was PLN 50.00 per share.

On 13 February 2024, the shares were registered by the District Court for the Capital City of Warsaw in Warsaw. On 28 May 2024, the Central Securities Depository of Poland (KDPW) issued a statement to the effect that it had entered into an agreement with the Company to register in the securities depository up to 50,000 Series AJ ordinary bearer shares and up to 50,000 Series AK ordinary bearer shares issued by the Company. The shares were registered pursuant to settlement orders as set out in Section 6 of the Detailed Rules of Operation of the Central Securities Depository of Poland, following the deregistration of the exercised subscription warrants. On 29 July 2024, the Central Securities Depository of Poland assimilated 50,000 Series AJ shares and 50,000 Series AK shares with the Company's listed shares bearing ISIN code PLDMDVL00012. On the same day, the Series AJ and AK shares were introduced to trading on the main market of the Warsaw Stock Exchange.

7.17 DIVIDEND AND APPROPRIATION OF PROFIT

DISTRIBUTION OF THE 2023 PROFIT

On 6 November 2023, based on the condensed interim financial statements of the Company for the six months ended 30 June 2023, audited by an independent statutory auditor, the Management Board resolved to distribute an interim dividend of PLN 141,341,321.00 (PLN 5.50 per share) for 2023. This resolution was subsequently approved by the Supervisory Board.

The Management Board set the record date for the interim dividend as 12 December 2023 and the payment date as 18 December 2023. All 25,698,422 Company shares were entitled to the interim dividend. The interim dividend was paid on 18 December 2023.

On 19 June 2024, the Annual General Meeting of the Company resolved on the appropriation of the Company's net profit for 2023, as well as on the dividend record date and payment date.

Pursuant to this resolution, the Annual General Meeting approved the appropriation of Dom Development S.A.'s net profit for 2023, amounting to PLN 441,113,631.24, as follows:

- 1. PLN 309,581,064.00 (PLN 12.00 per share) to be distributed to the shareholders of Dom Development S.A.; taking into account the interim dividend for 2023 of PLN 141,341,321.00 (PLN 5.50 per share) paid by the Company on 18 December 2023, the remaining dividend to be paid for 2023 amounted to PLN 168,239,743.00, subject to the following provisions:

7.30 MANAGEMENT FINANCIAL RISK

The Group is exposed to the following types of financial risk:

- market risk (interest rate risk),
- credit risk,
- liquidity risk.

MARKET RISK

Market risk reflects the impact of changes in market prices – such as exchange rates, interest rates, or the prices of equity instruments – on the Group's financial results or the value of its financial instruments.

Market risk primarily comprises the following types of risk:

- currency risk,
- interest rate risk.

Currency risk

Where the Group holds material foreign currency positions, it uses forward and swap currency derivatives to hedge significant future foreign exchange transactions.

As at 31 December 2024 and 31 December 2023, the Group had no material foreign currency-denominated assets, liabilities, or future payments, and therefore did not require the use of hedging currency derivatives.

Interest rate risk

Credit facilities contracted at fixed interest rates expose the Group to fair value risk. Bank and non-bank borrowings contracted at variable interest rates expose the Group to cash flow risk.

Under the current financing structure, the Group has no fixed-rate credit facilities or bonds. The Group currently holds short-, medium-, and long-term credit facilities and bonds at variable interest rates, exposing it to cash flow risk, although this risk is mitigated as described below.

As at the reporting date, the Group had no long-term fixed-rate financial instruments.

Interest rate risk is largely mitigated by the Group's exposure to both financial liabilities and financial assets, creating a natural hedge through variable interest rates. The Group's exposure to interest rate risk on bond financing is further mitigated through the use of hedging instruments, including:

- CAP options, which provide the Company with protection against rising market interest rates. Under these agreements, the bank compensates the Company for any increase in rates above the predefined cap, allowing it to hedge against upward movements while retaining the ability to benefit from potential rate declines;
- Interest Rate Swaps (IRS), which involve exchanging interest payments with the bank based on different interest rates. The Company swaps variable-rate interest payments for fixed-rate payments. Both sets of interest payments are calculated on a notional amount agreed in the transaction, with settlement occurring on specified dates by comparing the relevant reference rate with the contracted fixed rate.

As at the reporting date, the Group's portfolio of variable-rate financial instruments was as follows:

VARIABLE-RATE INSTRUMENTS	31 Dec 2024	31 Dec 2023
Financial assets	646,253	403,835
Financial liabilities	616,863	527,191
Total net	29,390	(123,356)

Financial assets include interest-bearing financial instruments, such as bank deposits and loans granted. Financial liabilities comprise interest-bearing obligations, including bank borrowings and bonds issued by the Company.

Sensitivity analysis of profit or loss to interest rate changes

A 100 basis point ('bps') change in the interest rates applicable to financial instruments as at the reporting date would increase (decrease) net assets and profit or loss (after tax) by the amounts presented in the table below. This analysis, conducted for the 12 months ended 31 December 2024 and 31 December 2023, assumes that all other variables remain constant.

^{*)} Borrowing costs on credit facilities and bonds are capitalised by the Group as part of work in progress and subsequently recognised in the statement of profit or loss as cost of sales.

CREDIT RISK

The Group's principal financial assets comprise bank balances, cash and cash equivalents, loans granted, trade receivables, and other receivables, representing the Group's largest credit risk exposure in relation to financial assets.

Credit risk is primarily associated with trade receivables. The amounts presented in the balance sheet are net of impairment allowances for doubtful receivables, as estimated by the Management Board based on historical experience, the nature of the business, and the assessment of the current economic environment.

Credit risk associated with liquid funds, including cash and cash equivalents as well as current financial assets, is limited, as transactions are conducted with reputable banks that hold high credit ratings assigned by international rating agencies. The following tables provide further details:

Credit risk associated with loans granted is limited, as transactions are exclusively conducted with entities affiliated with the Company, over which the Company exercises joint operational and financial control. Furthermore, these loans are secured against the borrowers' properties, the value of which — as well as the profitability of ongoing or prospective residential development projects — is continuously monitored by the Company.

To maintain liquidity and ensure the availability of financial resources at the targeted level, the Group has a dedicated unit responsible for monitoring its liquidity position. This unit actively monitors liquid funds and projected cash flows, making informed allocation decisions to optimise finance income while mitigating credit risk.

The Group has no material concentration of credit risk, with exposure diversified across a broad range of counterparties and customers. Moreover, trade receivables arising from the Group's principal business – the sale of residential units, commercial premises, and garages – are fully secured, as ownership is transferred only upon full payment of the purchase price under the preliminary sale agreement.

The ageing profile of trade receivables is presented in Note 7.10 Trade and other receivables.

LIQUIDITY RISK

Liquidity risk is the risk that the Group may be unable to meet its financial obligations as they fall due. The Group's objective is to maintain liquidity at a level that ensures it can meet its financial obligations as they fall due, without incurring unacceptable losses or compromising its reputation.

The table below sets out the total undiscounted future cash flows relating to the Group's financial liabilities, disaggregated by contractual maturities.

The Group manages liquidity primarily through:

- short-, medium-, and long-term cash flow planning, detailed short-term forecasting, with forecasts updated at least monthly,
- optimising funding sources, based on an analysis of the Group's requirements and market conditions,
- ongoing monitoring of financial covenants under credit facility agreements,
- diversifying funding sources for its residential property development activities, and
- engaging with financial institutions of established high standing.

Capital management

The Management Board's policy is to maintain a strong capital base to sustain investor, creditor, and market confidence while supporting the Group's continued growth.

For the years ended 31 December 2024 and 2023, the return on equity (calculated as net profit divided by the average annual balance of equity) was 36.1% and 32.2%, respectively. During the same period, the Group's weighted average cost of debt stood at 5.87% in 2024 and 5.52% in 2023.

As at 31 December 2024 and 2023, the Group's net leverage ratio (calculated as total borrowings and bonds, less cash and cash equivalents, and current financial assets, divided by equity) was 1.5% and 8.5%, respectively.

The Company has no defined share buyback plan.

The Group's entities are not subject to any externally imposed capital requirements other than the statutory requirements set out in the Commercial Companies Code.

As at 31 December 2024 and 2023, the Group's corporate income tax liabilities were PLN 14,564 thousand and PLN 24,351 thousand, respectively. At the same time, its corporate income tax receivables amounted to PLN 50,119 thousand and PLN 2,645 thousand, respectively.

The reconciliation of income tax, calculated as the product of profit before tax and the statutory tax rate, to the actual income tax expense recognised in the Group's statement of profit or loss is presented below.

RECONCILIATION	1 Jan-31 Dec 2024	1 Jan-31 Dec 2023

Actual income tax expense	137,275	113,005
Effective tax rate (%)	19.43%	19.71%

Regulations on value added tax, corporate income tax, and social security contributions are subject to frequent changes, With a resulting lack of appropriate points of reference, conflicting interpretations, and scarcity of established precedents to follow. Furthermore, the applicable tax laws lack clarity, which leads to differences in opinions and diverse interpretations of tax regulations, both between various public authorities and between public authorities and businesses.

Tax settlements and other areas of activity (e.g. customs or foreign exchange control) may be subject to inspections by authorities that are entitled to impose high fines and penalties, and any additional tax liabilities resulting from such inspections must be paid with high interest. Consequently, the tax risk in Poland is higher than in countries with more mature tax systems.

Therefore, although the Group's companies have historically adopted and continues to follow a highly prudent tax policy, it cannot be ruled out – albeit unlikely – that amounts presented and disclosed in the financial statements may change in the future as a result of a final decision by the tax authorities.

On 15 July 2016, amendments were made to the Tax Law reflecting the provisions of the General Anti-Abuse Rule (GAAR). GAAR is intended to prevent creation and use of abusive arrangements to avoid paying taxes in Poland. GAAR defines tax evasion as measures taken primarily for the purpose of achieving a tax benefit which in the given circumstances is contrary to the object and purpose of tax laws. In accordance with GAAR, no tax advantage can be obtained through an arrangement which is abusive. Any arrangements involving (i) separation of transactions or operations without a sufficient rationale, (ii) engaging intermediaries where no business or economic rationale exists, (iii) any offsetting elements, and (iv) any arrangements operating in a similar way may be viewed as an indication of the existence of an abusive arrangement subject to GAAR. The new regulations will require much more judgment to be exercised when assessing the tax consequences of particular transactions.

GAAR should be applied with respect to arrangements made after its effective date as well as arrangements that were made before its effective date, but the benefit of the tax advantage obtained through the arrangement continued or continues after that date. The implementation of the above regulations will grant Polish tax inspection authorities the authority to challenge certain legal arrangements made by taxpayers, including the restructuring or reorganisation of corporate groups.

7.33 SEGMENT REPORTING

The Group's operations are largely homogenous and focus on the construction and sale of residential and commercial properties, along with related support activities. While the Company operates exclusively in the Warsaw market, the Dom Development Group, in which it is the parent, also has operations in the Tricity, Wroclaw, and Krakow markets, Conducted through the Group's subsidiaries.

The key metrics for the assessment of the performance in each market are revenue, gross profit and gross profit margin earned in the respective markets.

Considering the above, the Group's reportable segments were identified based on the geographical location criterion:

- the Warsaw segment
- the Tricity segment
- the Wroclaw segment
- the Krakow segment.

Presented below is the Group's financial data disaggregated by the geographical location of the Group's residential development projects.

7.39 INVESTMENTS IN JOINT VENTURES ACCOUNTED FOR USING THE EQUITY METHOD

The Group has classified the following investments as joint ventures, which are measured in the consolidated financial statements using the equity method. Under the relevant agreements, all parties to the arrangements (co-investors) exercise joint control over these entities, with decisions on significant activities requiring unanimous consent. Additionally, the legal form of these separate entities does not confer upon the parties rights to their assets or obligations for their liabilities.

• BYSEWSKA Sp. z o.o.

On 2 July 2024, Euro Styl S.A. entered into an investment agreement with Activa JJ Sp. z o.o. regarding a planned residential development project. The project involves the comprehensive development and construction of several dozen single-family and multi-family residential buildings, along with the necessary infrastructure. The scope of the project includes, in particular, the design, financing, construction, and sale of approximately 550 residential units.

For this purpose, Bysewska Sp. z o.o. was established with a share capital of PLN 100 thousand, with each co-investor holding a 50% equity interest as at 31 December 2024.

The entire land intended for the development was acquired by Bysewska Sp. z o.o. in 2024.

DOKI V Sp. z o.o.

On 12 July 2024, Euro Styl S.A. entered into an investment agreement with Grupa Torus Sp. z o.o. S.K.A., represented by Torus Sp. z o.o. (registered in Gdańsk), for the development of a residential project. The project involves the comprehensive development and construction of multi-family residential buildings, together with the necessary infrastructure, as well as an ancillary project, if applicable. The scope of the project includes the design, financing, construction, and sale of approximately 550 residential and commercial units.

For this purpose, DOKI V Sp. z o.o. was established with a share capital of PLN 100 thousand, with each co-investor holding a 50% equity interest as at 31 December 2024.

The land intended for the project is covered by a conditional preliminary sale agreement. The transfer of ownership is contingent upon the adoption of a resolution by the Gdańsk City Council determining the project's location. Once the resolution is passed, an application for a building permit can be submitted.

7th Management Share Option Programme	-	-	-	250,000	250,000	100,000

Management share option programmes operated in the 12 months ended 31 December 2024.

5th Management Share Option Programme

On 29 November 2019, the Supervisory Board of the Company, acting under the authority granted by the Annual General Meeting, passed a resolution approving the terms of the 5th Management Share Option Programme for Mr. Mikołaj Konopka, Member of the Management Board, covering 250,000 shares in Dom Development S.A. ('5th Programme'). Pursuant to the terms of the programme, Mr Konopka was granted a one-off award of options, entitling him to acquire 250,000 shares in Dom Development S.A. at a price of PLN 50.00 per share. The exercise of these options was subject to a vesting cap, restricting the number of shares that could be acquired to 50,000 within any rolling 12-month period, commencing on 1 January 2021. As at 31 December 2024, all options granted under the 5th Management Share Option Programme had been fully exercised.

7th Management Share Option Programme

On 4 November 2022, the Supervisory Board of the Company, acting under the authority granted by the Annual General Meeting, passed a resolution approving the terms of the 7th Management Share Option Programme for Mr. Leszek Stankiewicz, Vice President of the Management Board, covering 250,000 shares in Dom Development S.A. ('7th Programme'). Pursuant to the terms of the programme, Mr Stankiewicz was granted a one-off award of options, entitling him to acquire 250,000 shares in Dom Development S.A. at an exercise price of PLN 50.00 per share. The exercise of these options was subject to a vesting cap, restricting the number of shares that could be acquired in a calendar year to 50,000, in 2022. By March 2024, Leszek Stankiewicz had subscribed for 150,000 shares in the Company under 7th Programme. On 29 November 2024, Mr. Stankiewicz formally renounced his right to exercise options over 100,000 shares in the Company granted to him under the programme. As a result, the 7th Programme has been extinguished.

Grant of new share options under Management Share Option Programmes

In the 12 months ended 31 December 2024 the Company did not grant any new share options.

Exercise of share options under Management Share Option Programmes

In the 12 months ended 31 December 2024, the Management Board increased the Company's share capital by issuing 50,000 Series AJ ordinary bearer shares and 50,000 Series AK ordinary bearer shares. The issue price of the shares was set at PLN 50.00 per share. The purpose of the issue of shares within the limits of the authorised share capital was to enable the Company to meet its obligations arising from:

 5th Management Share Option Programme for Mikołaj Konopka, Member of the Management Board, concerning 250,000 Dom Development shares, and

 7th Management Share Option Programme for Leszek Stankiewicz, Vice President of the Management Board, concerning 250,000 Dom Development shares.

For more information on the issue of Series AJ and Series AK shares, see Note 7.15.

Expiry of share options under Management Share Option Programmes

On 29 November 2024, Mr. Stankiewicz formally renounced his right to exercise options over 100,000 shares in the Company granted to him under the programme. As a result, the 7th Programme has been extinguished.

7.50 SIGNIFICANT EVENTS SUBSEQUENT TO THE REPORTING DATE

There were no material events in the Group after the reporting date.

7.51 APPROVAL OF THE 2023 FINANCIAL STATEMENTS

On 19 June 2024, the Annual General Meeting of Dom Development S.A. approved the financial statements for the year ended 31 December 2023, as presented by the Management Board, along with the Management Board's report on the operations of Dom Development S.A. and its Group in 2023, and the consolidated financial statements of the Dom Development S.A. Group for the year ended 31 December 2023. The Annual General Meeting granted discharge of duties to the Management Board members for the 2023 financial year.

7.52 FORECASTS

Save for the forecasts described below, the Management Board of Dom Development S.A. does not publish financial forecasts for either the Parent or the Group.

In accordance with the Bonds Act of 15 January 2015, the Company is required to publish forecasts of its financial liabilities on its website until the full redemption of its outstanding bonds (Article 35 of the Act).

The table below sets out the forecasts published by the Company on 28 December 2023, together with the actual figures derived from these consolidated financial statements prepared as at 31 December 2024.

	Forecast as at 31 Dec 2024		Actual as at 31 Dec 2024	
Type of financial liability	Forecast value of liability	Forecast share in total equity and liabilities	Actual value of liability	Share in total equity and liabilities
Liabilities under borrowings	450,000	8.03%	-	0.00%
Liabilities under outstanding debt securities	520,000	9.27%	610,000	11.53%
Lease liabilities	152,760	2.72%	125,015	2.36%

The variance between the lower actual level of total financial liabilities as at 31 December 2024 and the forecasts published in accordance with the Bonds Act is attributable to:

- a lower-than-anticipated level of Group debt, driven by a higher-than-expected net cash flow from operating activities;
- a slightly slower-than-planned pace of new residential development project launches (and associated expenditures), reflecting the Group's adjustment of its offering in response to weaker-than-expected market demand;
- lower-than-forecast expenditure on land acquisitions for future residential development projects, as well as the deferral of certain expenditures to 2025, which also resulted in lower-than-expected lease liabilities related to perpetual usufruct rights to land.

Additionally, the Management Board resolved to raise debt financing through a bond issuance in place of bank borrowing, issuing bonds with a nominal value of PLN 140 million on 5 December 2024.
