- the Group did not make any material deposits or capital investments within the framework of the Dom Development Capital Group. All free cash was invested by the companies operating within the Group in short-term bank deposits.

1.3. Information on core products

The main aim of the Group has always been the construction of affordable flats in the so-called popular segment (mid-market). The Group's offer is supplemented with other market segment products.

Currently, product assortment of the Group comprises multi-family buildings (flats and apartments), which can be divided into the following market segments:

- *Popular flats (mid-market)* – flats in residential buildings and housing estates are usually located outside of the immediate city centre, normally with at least 200 flats.
- *Apartments* – apartments in residential buildings or small groups of buildings located in Warsaw's city centre and in popular residential districts (Żoliborz, Mokotów, Śródmieście, Ochota).

Flats and apartments are offered in two standards: "turn-key" and unfinished. The unfinished flats/apartments are finished by buyers on their own account. Various finishing options are available for "turn-key" flats/apartments.

- *Commercial space* – mainly shops constructed by the Company as part of residential buildings. The revenues from the sale of such space account for an insignificant part of the total revenue but they enable the possibility to offer such facilities as shops, which increases the attractiveness of a given project.

In addition to this, the Company's tasks include the management of housing estates constructed under development projects conducted by the Group. Management will be performed only through a limited period of time, i.e. until the final management company is chosen by the common hold associations which take over the managerial duties from the Company.

In 2014, the Group's revenue from the sale of products and services related to real estate management were as follows:

REVENUE STRUCTURE	01.01- -31.12.2014 in thousand PLN	01.01- -31.12.2013 in thousand PLN	Change 2014/2013

1.4.2 Major contractors

The main costs incurred by the Company in the real estate development activity are the costs of construction services provided by third parties, not related to the Company, under a general contracting system and the purchase costs of land for the investment projects.

2.2. Development of Dom Development S.A. Capital Group, risk factors

2.2.1 Significant risk factors and factors important for development of the Group

Significant risk factors and threats to the business activity conducted by the Company have been presented below.

Macroeconomic factors

The Group's business activities are significantly affected by global developments, and in particular by their impact on the Polish economy. The most important macroeconomic factors for the Group's financial condition and results include the economic growth rate (risk of growth deceleration), unemployment rate (risk of growing unemployment), position of financial institutions (risk of a decrease in trust). The business activities of the Group are affected by the following macroeconomic factors, which have an impact on the state of the Polish economy: GDP, level of investments, household income, interest rates, inflation, unemployment and the condition of the real estate development and construction industries, and the real estate market.

Availability of mortgages

In 2014, a factor that supported market demand was access to mortgages. Interest rates reached another low after the reference rate was reduced to 2.00% in October 2014. The expected maintenance of the cost of mortgages at a low level may cause customers to be more likely to take out a mortgage. The level of interest rates also translates into a reduction in the repayment instalments and increased creditworthiness of persons who apply for a mortgage for an apartment.

Since the amended Recommendation S of the Financial Supervision Authority came into effect in 1 January 2014 a deposit with 5% of the property value was compulsory in 2014, whereas the required deposit increased to 10% of the property value from 1 January 2015. In the following years the required deposit level will gradually increase to reach 20% in 2017. The increase in the required level of the deposit may gradually reduce access to mortgages and make people with lower levels of savings put off their decision on a purchase or purchase a cheaper dwelling. This brings about the risk of reduced average transaction value and number of transactions in the real estate market.

Foreign exchange risk

As per Recommendation S issued by the Financial Supervision Authority, which came in effect early in January 2014, foreign exchange loans are to be provided only when majority of a mortgage taker's income is earned in a specific currency. This is to prevent speculations and reduce foreign exchange risk. A great deal of foreign currency loans are mortgages. This brings about the risk of borrower insolvency, and therefore more apartments seized by the banks being put on the market, where a decline in demand from potential buyers who are not able to obtain such loans, is observed.

Foreign currency loans that were taken out at lower exchange rates than they are at present due to PLN depreciation against EUR or CHF often exceed the real value of the properties bought that constitute security for mortgages.

Concentration of operations in the Warsaw market

The Group's present and planned activity is concentrated in the Warsaw market. This makes the Group's results highly dependent on the situation in this market. However, it can be assumed that in the long-term this will be the most dynamic residential real estate market in Poland, and the Group already has a well-established position and therefore the possibility of further development. Currently, the Group is also developing its business in the Wroclaw market where projects are being executed in three locations. A further expansion of the Group is also considered.

Opportunity to purchase land for new projects

The future success of the Company and the Group is founded on their ability to continually and effectively acquire attractive land for new development projects at the right times and at competitive prices. This will allow the generation of satisfying project contributions.

Administrative decisions

The nature of real estate development projects requires a number of licenses, permits and arrangements to be obtained by the Company and the Group at every stage of the development process. Despite significant caution applied in the project execution schedules there is always a risk of delay in their obtainment, challenges to decisions which have already been issued (also due to appeals with no consequences for appellants) or even failures in obtaining them. All these affect the ability to conduct and complete the executed and planned projects.

The fundamental activity adopted by the Group so as to reduce the exposure to market risks is proper assessment of potential and control of current development projects based on investment models and decision-making procedures developed in the Company. The adherence to such procedures is closely monitored by the Management Board of the Company.

There has been a formalised risk management procedure in operation within the Company since 2000. Under this procedure the risk is managed through the identification and assessment of the risk areas for all aspects of the activities in which the Company and the Group are involved, together with defining activities required to reduce or eliminate such risks (including through procedures and an internal audit system) The risk management procedure is subject to periodic revision and is updated by the Management Board jointly with the key management staff and third party advisers.

2.2.2 Perspectives for the development of the Company's and the Group's business activities

In 2014, the conditions in the primary apartment market were favourable for developers and also for customers. Buyers were able to choose from a broad offer with stable prices, and both parties felt the large positive influence of low interest rates. The management board believes that the good market conditions should sustain in 2015.

The Group intends to continue its activities in the current scope. In order to ensure a proper offer structure, the Group will continue to develop its land bank while attempting to balance the proportions between land owned on the left and right bank of the Vistula river in Warsaw and continue to search for attractive land in Wroclaw. A major objective and task of the Management Board in the last year was to prepare the Group to face new challenges in the face of the favourable conditions. The major steps undertaken in this respect included:

- ensuring that adequate sources of finance are available to the Group, both for current and future real estate development projects, with due care from the perspective of the Group and its customers,
- co-operation with banks, and strong assistance to customers in obtaining mortgages for purchase of an apartment,
- adjusting the sales offer to the market demand,
- aligning land purchase outlays to Group's existing and future needs,
- optimizing the way and time the current land bank is used,
- increasing the efficiency and scale of sales support activities,
- maintaining and building upon customer confidence in the Dom Development brand,
- restructuring the organization and employment to the anticipated level of operational activities,
- optimising general administrative expenses.

The above-mentioned measures taken by the Management Board will be continued in 2015. In addition to this, in the next twelve months Dom Development S.A. Capital Group will focus, in particular, on the further increase of sales volume as compared to 2014 and the increase of its share in the Warsaw real estate market. This will be possible due to:

- the well-established position in the Warsaw residential property market,
- the high qualifications and potential of the Group's management,
- the worked out know-how in respect of operational execution of development projects,
- accumulated experience in selling and financing development projects,
- the land bank (for both, ongoing and future projects).
- very good liquidity of the Group.

In the upcoming twelve-month period it is also planned to:

- further focus on the operating activities in the popular flat segment and maintain activities in the remaining product groups within the offered product range,
- develop operations of the Group outside the Warsaw market (in particular in Wroclaw).

3.1.3 Selected information from the consolidated cash flow statement

	(in thousand PLN)		Change
	2014	2013	
Cash and cash equivalents – opening balance	322 250	175 918	86%
Net cash flow from operating activities	136 943	(8 764)	na.
Net cash flow from investing activities	(36 627)	231 466	na.
Net cash flows from financing activities	(104 225)	(76 460)	na.
Cash and cash equivalents – closing balance	318 341	322 250	(1)%

Cash balances amounted to PLN 322 250 thousand at the beginning of 2014 and they amounted to PLN 318 341 thousand at the end of the year. Therefore in the period from 1 January until 31 December 2014 the balance of cash dropped by PLN 3 909 thousand.

In 2014, the Group recorded a net inflow of cash from the operating activities in the amount of PLN 136 943 thousand. This result is due to two factors: an increase in sales recorded by the Group in the last year and the cash flow from customers, and the funds spent for the continuation of current and execution of future development projects.

In 2014, the Group disclosed a net outflow of cash from investing activities in the amount of PLN 36 627 thousand. This results mostly from the presentation of bank deposits with a maturity of over 3 months in the amount of PLN 30 001 thousand as cash flow from investing activities.

In 2014, the Group recorded a net cash outflow from the financing activities in the amount of PLN 104 225 thousand. The excess of financial outflow over the inflow is mainly due to reduced balance of loans (net cash outflow in the amount of PLN 50 000 thousand) and the payment of dividends by the Company in the amount of PLN 54 495 thousand.

3.2. Forecasts

Both, Dom Development S.A. Capital Group and the parent company did not publish financial forecasts for 2014.

3.3. Finance management in the Group

In 2014, the finance management of Dom Development S.A. Capital Group in respect of construction of residential buildings was focused on seeking and structuring sources of external financing for the projects under construction and on maintaining a safe level of liquidity. The Management Board analyses the current and plans the future optimum financing structure on a regular basis in order to achieve planned ratios and financial results, and at the same time, to ensure liquidity and the comprehensive financial security of the Group. In 2014, the activities of the Group generated a positive result at each level of the income statement.

The Management Board is of the opinion that the net assets and financial standing of Dom Development S.A. Capital Group at the end of 2014 demonstrate the strong and stable financial position of the Group. This results from the well-established position of the Group in the housing market, appropriate operational experience and potential in place, both in terms of execution of residential development projects, and the sale and financing of these projects. The net assets and financial standing of the Group has been demonstrated by liquidity and debt ratios presented further in this report.

Having considered the situation in the Polish real estate market in recent years, the financial results achieved by the Group in 2014 can be considered good. In 2014, the Group delivered 1 958 apartments (including high-end apartments) to its customers as compared to 1,562 units in 2013. The financial result in 2014 is a little higher than the result achieved in 2013. At the same time, in 2014 the Group sold 1 889 apartments (including high-end apartments) which is 18% more than in 2013, and this may be considered as being a very good result.

3.3.1 Profitability ratios

The ratios showing profitability of the business activity pursued by the Group in 2014 have slightly reduced as compared to the previous year. It predominantly results from the fact that the average margin generated on the products delivered in 2014 was lower than on the products delivered in 2013.

PROFITABILITY RATIOS	2014	2013
Operating profit margin <i>EBITDA / net sales revenue</i>	9.2%	11.3%
Net profit margin <i>Net profit / net sales revenue</i>	7.1%	8.1%
Return on assets (ROA) <i>Net profit / total assets</i>	3.5%	3.2%
Return on equity (ROE) <i>Net profit / shareholders' equity</i>	6.5%	6.4%

3.3.2 Liquidity ratios

Having considered the specifics of the real estate development industry with its long production cycle and tighter funding requirements for the companies operating in this sector, the Group has been in an extremely comfortable position.

This is due to a number of long-term decisions and actions taken by the Company's Management Board. These high ratios to a high extent result from the relevant financing structure applied, that is predominantly medium-term and long-term, as opposed to short-term and medium-term financing. The liquidity ratios are driven by decisions around financing of current investments (including decisions when to commence the construction of individual estates and concerning the product mix offered for sale), the purchase of new properties and management of suitable employment levels and overheads.

All the liquidity ratios have remained at a very safe level in 2014, similarly to those in 2013. A reduction in the value of the ratios in 2014 in relation to 2013 has been a consequence of the fact that the repayment of a mortgage tranche (PLN 26 000 thousand) and bonds (PLN 100 000 thousand) is due in 2015. As of 31 December 2013, the Group did not have any short-term loan and bond liabilities.

The Management Board is of the opinion that the credibility of the Group in the financial market is high which is reflected by the diversified financing structure and by good relationships with banks and other financial institutions in the form of them providing the Group with loans and other forms of long-term finance (bonds).

LIQUIDITY RATIOS	2014	2013
Current ratio <i>current assets / short-term liabilities less deferred income</i>	5.71	11.31
Quick ratio <i>current assets less inventory / short-term liabilities less deferred income</i>	1.30	2.46
Cash ratio <i>cash and cash equivalents, and bank deposits with a maturity of over 3 months / short-term liabilities less deferred income</i>	1.25	2.12

3.3.3 Leverage ratios

Appropriate operating policy (i.e. proper commencement and pace of projects as well as controlled purchases of land) and conservative financing policy (the financing structure), maintained leverage ratios at adequate levels to support the business activity and maintain the Company's and Group's creditworthiness.

The debt ratios with values slightly lower at the end of 2014 than those at the end of 2013 continue to reflect the conservative approach of the Company's governing bodies to the sources of finance for operations.

The changes to liabilities for loans and bonds are the best position to reflect "net cash flows from financing activities" described in section 3.1.3 of this report.

LEVERAGE RATIOS	2014	2013
Equity ratio <i>shareholders' equity / total assets</i>	53.4%	49.5%
Liabilities to equity ratio <i>total liabilities / shareholders' equity</i>	87.2%	101.8%
Liabilities to assets ratio <i>total liabilities / total assets</i>	46.6%	50.5%
Interest bearing debt to equity ratio <i>interest bearing liabilities (including accrued interest) / shareholders' equity</i>	46.3%	52.3%
Net interest bearing debt to equity ratio <i>(interest bearing liabilities (including accrued interest) less cash and cash equivalents, and bank deposits with a maturity of over 3 month) / shareholders' equity</i>	5.2%	14.1%

The Group intends to finance the execution of real estate development projects from the shareholders' equity, bank loans and issue of commercial papers. 4. STATEMENT ON THE APPLICATION OF CORPORATE GOVERNANCE

Company's corporate governance rules and the location, where the text of corporate governance rules is publicly available

Dom Development S.A. followed the corporate governance rules described in the Code of Best Practice for Warsaw Stock Exchange Listed Companies, adopted by the Supervisory Board of the Warsaw Stock Exchange on 4 July 2007 pursuant to Resolution No. 12/1170/2007 of the WSE Supervisory Board (as amended).

The Code of Best Practice for Warsaw Stock Exchange Listed Companies is publicly available on: <http://www.corp-gov.gpw.pl/publications.asp>

In 2014 the Company deviated from the best practice described in part IV section 10.2) of DPSN (*Code of Best Practice for WSE Listed Companies*) in effect since 1 January 2013, according to which the Company should enable the shareholders to attend the Shareholders Meeting using means of electronic telecommunication enabling two-way communication in real time thus allowing the shareholders to speak during the proceedings of the Shareholders Meeting while being away from the place of the meeting.

The justification of the decision to deviate from the aforementioned best practice published in the report EBI no. 1/2013 of 20 January 2013 read as follows:

"The Company will not provide the option of participating in a general meeting in accordance with Part IV section 10.2) of the Code of Best Practice because of the increased risk of irregularities during the course of the general meeting. The Company's Management Board decided that the above best practice would not be complied with due to the potential issues related to, inter alia, identification of Shareholders, the choice of the best media of the remote bilateral communication, and the Company's inability to guarantee compliance with the hardware requirements on the part of a Shareholder.

The Company's Management Board believes that issues of legal, logistical and technical nature which are related with providing the option of real-time bilateral communication where the shareholders may take the floor during a general meeting from a location other than the general meeting are greater than the potential benefits for the Shareholders. In the opinion of the Company's Management Board the existing rules of participating in the general meeting assure correct exercise of the rights related to the holding of the Company's shares by all the Shareholders, while a possible interruption of the general meeting in consequence of disruption of the remote bilateral communication would create material inconvenience of for the Shareholders or their attorneys present at the meeting.

The Company's Management Board does not rule out the possibility of complying with the above rule of good practice in the future, and the Management Board's decision to implement it depends on the development of proper standards of its application in practice."

Company's corporate governance rules adopted voluntarily and the location, where the text of such corporate governance rules is publicly available

In 2014, Dom Development S.A. followed the corporate governance rules published in the Code of Best Practice for Customer-Developer Relations drafted by Polski Związek Firm Deweloperskich (*the Polish Union of Developers*).

An Ordinary General Shareholders' Meeting is convened by the Management Board. It takes place in Warsaw within 6 months following the end of each financial year. Shareholders are entitled to participate in the General Shareholders Meeting provided that they were shareholders of the Company 16 days before the date of the General Shareholders Meeting (registration date for participation in a general shareholders' meeting). No invitations are required for members of the Company's Management Board and the Supervisory Board to participate in a General Shareholders' Meeting. Other persons, in particular statutory auditors and experts, as invited by the Management Board, may participate in a session or an appropriate part thereof, should their participation be justified by the need to have their opinions on the discussed matters presented to the participants in the General Shareholders' Meeting. A statutory auditor should be present at a session of the General Shareholders' Meeting where Company's financial matters are addressed.

The General Shareholders' Meeting is valid and may adopt resolutions only if shareholders holding at least 50.1% of all votes are represented at the Meeting. Resolutions are adopted by an absolute majority of validly cast votes, unless the Code of Commercial Companies or the Articles of Association of the Company provide otherwise. An electronic system for casting and calculating votes may be used for voting. Pledges and beneficial owners of shares are not entitled to exercise voting rights attached to shares.

A resolution on the removal of certain matters from the agenda of the General Shareholders' Meeting or the abandonment of certain matters included in the agenda or placed on the agenda by a motion of shareholders requires a majority of three-fourths of the votes cast and the express prior consent of all present shareholders who have filed such motion, for it to be valid.

The Chairman puts the agenda to vote, having the attendance list signed and checked. The General Shareholders' Meeting may adopt the suggested agenda without changes, change the order of debate or remove certain matters from the agenda, subject to the provisions of the Articles of Association of the Company. The General Shareholders' Meeting may also put new matters on the agenda and discuss them, however without adopting any resolutions on such matters. The Chairman of the Meeting has no right to remove matters from the agenda or alter the same without the consent of the General Shareholders' Meeting.

Each participant in the General Shareholders' Meeting may speak on matters included in the adopted agenda which are currently brought up for discussion. The Company did not question the correctness of documents submitted by shareholders and their attorneys in support of their right to represent a shareholder when verifying shareholders' IDs being the proof of their entitlement to participate in the General Shareholders' Meeting.

The Chairman of the General Shareholders' Meeting ensured that the session proceeded in an orderly and efficient manner. Sessions of a General Shareholders' Meeting have never been cancelled or discontinued. Members of the Management Board and the Supervisory Board present at the General Shareholders' Meeting readily explained all matters within their competences and as required by the law.

4.10. Internal control and risk management systems

Description of the basic features of the internal control and risk management systems in place in the Company for the preparing of standalone and consolidated financial statements

The Company's Management Board is responsible for the internal control system in the Company and its effectiveness in the preparing of financial statements and periodic reports prepared and published in accordance with the Regulation by the Minister of Finance dated 19 February 2009 on the current and periodic submissions by securities issuers.

The effectiveness of the Company's internal control and risk management systems in financial reporting was ensured through the following means:

The structure and scope of financial reporting applied by the Company

The medium term plan (covering a period of at least 3 years) is updated on a yearly basis in the Company. In addition to this, a detailed operating and financial budget which implements the assumptions of the medium-term plan are prepared every year. The process is managed by the Management Board and the middle and executive management of the Company is also involved. The budget, which is prepared annually for the following year, is approved by the Company's Management Board.

During any specific year, the Company's Management Board reviews the current financial results versus the adopted budget. The management reporting methodology applied in the Company is used for this purpose. This reporting is based on the accounting policy adopted by the Company (in line with the International Financial Reporting Standards) and takes into account the form and level of detail of financial data presented in the financial statements of the Company and the Group.

Consistent accounting policies are applied by the company for presenting its financial details in the financial statements, periodic financial reports and management reports.

Clear division of duties and competences in the process of preparing financial information

The financial division headed by the Vice President of the Management Board as the Company's CFO is responsible for the preparing of financial statements, periodic financial reports and current management reports of the Company.

The Company's finance statements are prepared by a team of highly qualified employees from the finance and accounting division, with the assistance of the planning and analysis unit. The entire process is supervised by middle management from the financial division. The financial statements, when ready, are verified by the financial controller (responsible for the accounting department and planning and analysis unit) and then by the Vice President of the Management Board as the Company's CFO, prior to being submitted to the independent statutory auditor.

Regular assessment of the Company's operations based on its financial reports

The figures used in the financial statements and periodic reports and in the monthly management and operating reports come from the Company's financial and accounting system. Detailed financial and operating management reports are prepared, having all predefined book-closing procedures completed at the end of each month. These reports, in addition to historical financial data, are supplemented with quantitative operating data and forecasts by the planning and analyses unit. These reports are scrutinized by middle and executive management of individual organizational units of the Company and by the Management Board. As regards closed reporting periods, the Company's financial results are scrutinized versus the budgets and forecasts made in the month preceding the reporting period subject to scrutiny. Taking into consideration the specific nature of the sector, not only individual cost groups are scrutinized but also individual investment projects.

Any identified deviations and errors are clarified and corrected in the Company's books on an ongoing basis, in accordance with the adopted accounting policy.

Verification of the Company's financial statements by an independent statutory auditor

Pursuant to the applicable legal regulations, the Company's financial statements are reviewed or audited, respectively, by an independent statutory auditor. This is always a prime and highly qualified statutory auditor.

A so-called Audit Life Cycle has been developed in the Company. This is a cyclical schedule of communication between the Management Board, the statutory auditor and the Audit Committee of the Supervisory Board. The purpose of this schedule is to ensure appropriate interaction between the Audit Committee and the statutory auditor as well as appropriate presentation of the results of the above mentioned review and audit.

Formalised process for significant assessments that considerably affect the Company's financial statements

The fundamental activity adopted by the Company so as to reduce the exposure to market risks is proper assessment of potential and control of current development projects based on investment models and decision-making procedures developed in the Company. The adherence to such procedures is closely monitored by the Management Board of the Company.

As implied by the accounting policy adopted by the Company in this respect, detailed budgets for individual development projects that are prepared in accordance with the best practice and experience of the Company constitute the grounds for the calculation of revenue from the sale of products and costs of products sold. The budgets for all construction projects are updated at least once every three months, during the execution of the projects. The update is based on the formalised principles in place in the Company and is scrutinized by the Management Board, in particular by the Vice President of the Management Board as the Company's CFO.

Risk management process and internal audit

There has been a formalised risk management procedure in operation within the Company since 2000. Under this procedure the risk is managed through the identification and assessment of the risk areas for all aspects of the activities, in which the Company and the Group are involved, together with defining activities required to reduce or eliminate such risks (including through the procedures and internal audit system) The risk management procedure is subject to periodic revision and is updated by the Management Board jointly with the key management staff and third party advisers.

The internal audit unit that is in place in the Company also participates in the process of risk identification and assessment of the control measures. The schedule of internal audits is created based on the risk assessment made in cooperation with the Management Board under the supervision of the Audit Committee. In addition to scheduled audits, there are verification audits to check implementation of recommendations formulated in the previous audits and non-scheduled audits. The findings of internal audits are reported to the Audit Committee and to experts appointed by this Committee.
